

Vibration Isolation Workstation

By Staff -- Semiconductor International, 5/1/2007

The MK26 Series vibration control workstation was designed for ultralow natural frequency applications and negative stiffness vibration isolators. No air supply or electric power is needed with the Class 100 cleanroom-compatible workstation. It has a vibradamped frame with a maximum load capacity of 700 lb. **Minus K Technology Inc.**, Inglewood, Calif., www.minusk.com
