Microscopy Today – January 2026 Minus K Technology is Giving Vibration Isolators to US Colleges

Minus K Technology, Inc. is offering \$25,000 worth of passive negative-stiffness low-frequency vibration isolators to US colleges for use with instruments such as AFMs, electron microscopes, interferometers, laser optical systems, and microhardness testers. Recipients will be selected based on the proposed use and applicability of the isolators, and the deadline to apply is February 28, 2026. Entry forms and application details are available at www.minusk.com. For more information, contact Steve Varma at Minus K Technology, Inc. by phone at (310) 348-9656.
